

ABHIJIT SWAIN

Bangalore, Karnataka • +91 9937358951 • swain.abhijit0119@gmail.com • linkedin.com/in/abhijit-swain-414556329

PROFESSIONAL SUMMARY

Associate Full Stack MERN Developer with hands-on experience building scalable web applications, RESTful APIs, and real-time systems using JavaScript, TypeScript, React, Node.js, and Express. Experienced with Docker, Kubernetes, CI/CD pipelines, and cloud deployments. Familiar with AI/LLM integrations, prompt engineering, and agentic workflow automation. Open-source contributor with strong software engineering fundamentals — OOP, data structures, microservices architecture, and SDLC best practices — eager to contribute to cloud-native B2B SaaS platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++

Frontend: React.js, HTML5, CSS3, Material UI, Ant Design, Responsive UI Development

Backend & APIs: Node.js, Express.js, Feathers.js, RESTful API Design, Microservices Architecture, API-first Design

Databases: MongoDB, PostgreSQL, Cassandra, BigQuery — data modeling, pipelines, and aggregation

DevOps & Cloud: Docker, Kubernetes (EKS), AWS (EC2, S3, Lambda, API Gateway), GitHub Actions, GitLab CI/CD, CircleCI

Data & Monitoring: Apache NiFi, Data Ingestion & Transformation, Prometheus, Grafana, ELK Stack

AI & Automation: WebRTC, Socket.IO, LLM/AI Integrations, Prompt Engineering, Agentic AI Patterns, Intelligent Workflow Automation

KEY PROJECTS

EchoMeet — Real-Time Video Conferencing App | *Personal Project* 2024

- Engineered a real-time peer-to-peer video conferencing platform using WebRTC, Socket.IO, Node.js, and Express; designed scalable backend handling multiple concurrent sessions with event-driven architecture.
- Implemented RESTful API principles and socket-based communication patterns; applied modular architecture with Git version control and CI/CD-aligned delivery workflows.
- Built automated session management scripts supporting meeting hosting, screen sharing, and in-app messaging — demonstrating real-time systems design and backend scripting capabilities.

WanderLust — Full-Stack MERN Web Application | *Personal Project* 2024

- Developed a full-stack property listing platform using the MERN stack (MongoDB, Express, React, Node.js) with secure JWT-based authentication and role-based access control (RBAC).
- Implemented dynamic CRUD operations with seamless frontend-backend integration, adhering to OOP principles and RESTful API design; deployed via Docker with CI/CD pipeline integration using GitHub Actions.
- Conducted unit testing and debugging cycles across feature iterations; maintained UAT-ready code quality through modular architecture and Git branching workflows.

Anigram — Open Source Contribution | *GitHub* 2024

- Identified and resolved critical bugs improving application stability; implemented new frontend rendering features and API integrations collaborating with distributed teams via GitHub pull requests and peer review.
- Documented error patterns and devised reusable resolution processes; contributed to long-term maintainability and team knowledge sharing aligned with production engineering standards.

EDUCATION

Master of Computer Applications (MCA) | Srusti Academy of Management And Technology, Bhubaneswar

Bachelor of Computer Applications (BCA) | Regional College Of Management, Bhubaneswar

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- Full Stack Development — MERN stack, RESTful APIs, authentication, deployment, Docker, Kubernetes fundamentals.
- AI & Automation — Applied LLM/AI developer tools, prompt engineering, agentic workflow patterns, and automated response mechanisms in personal projects.
- Cloud & DevOps — Hands-on with CI/CD pipelines (GitHub Actions), containerized deployments, and AWS fundamentals (EC2, S3, Lambda).
- Open Source Contributor — Active GitHub contributor with experience in distributed workflows, pull request reviews, issue resolution, and technical documentation.
